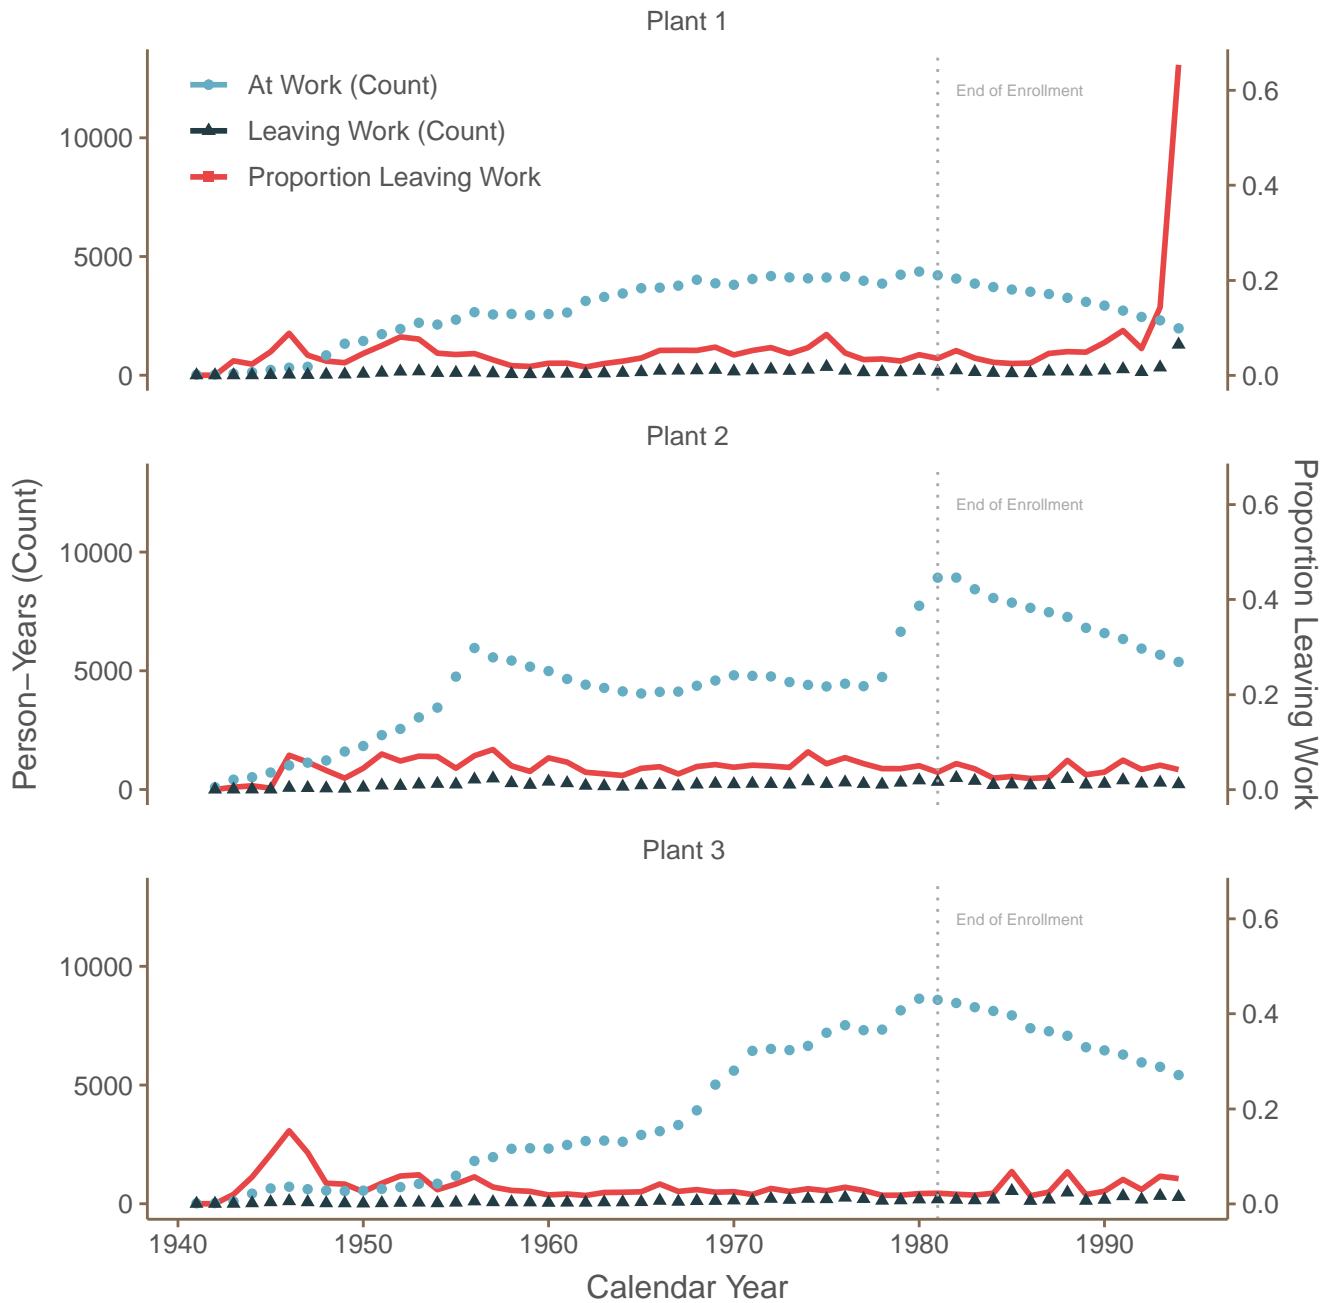

Figure 1: Employment trends at each of the three plants. Points represent the number of people employed and leaving work (left axis) while the line denotes the proportion of employed individuals leaving work (right axis) in a given calendar year.

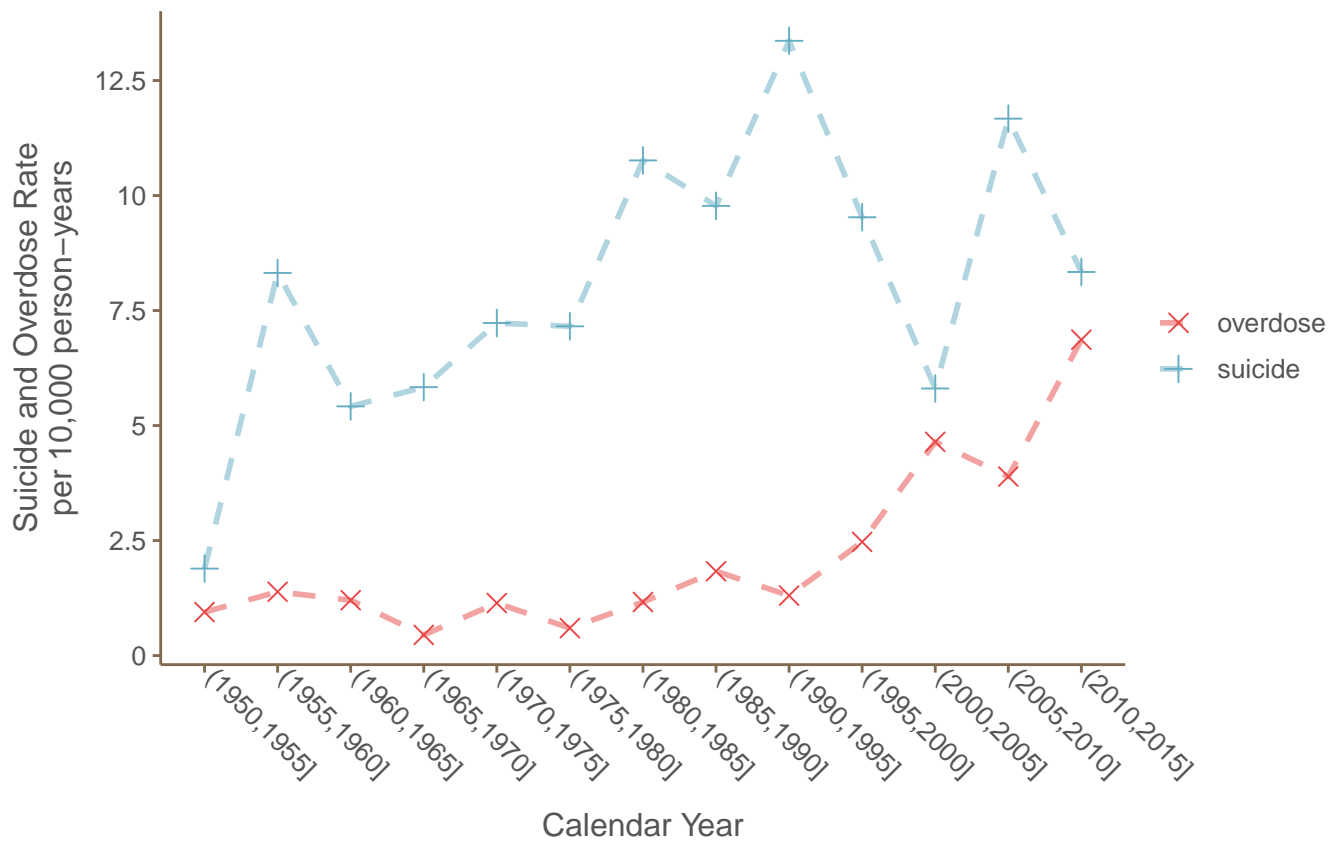

Figure 2: The estimated incidence rates of overdose and suicide by calendar time in the full UAW-GM cohort.

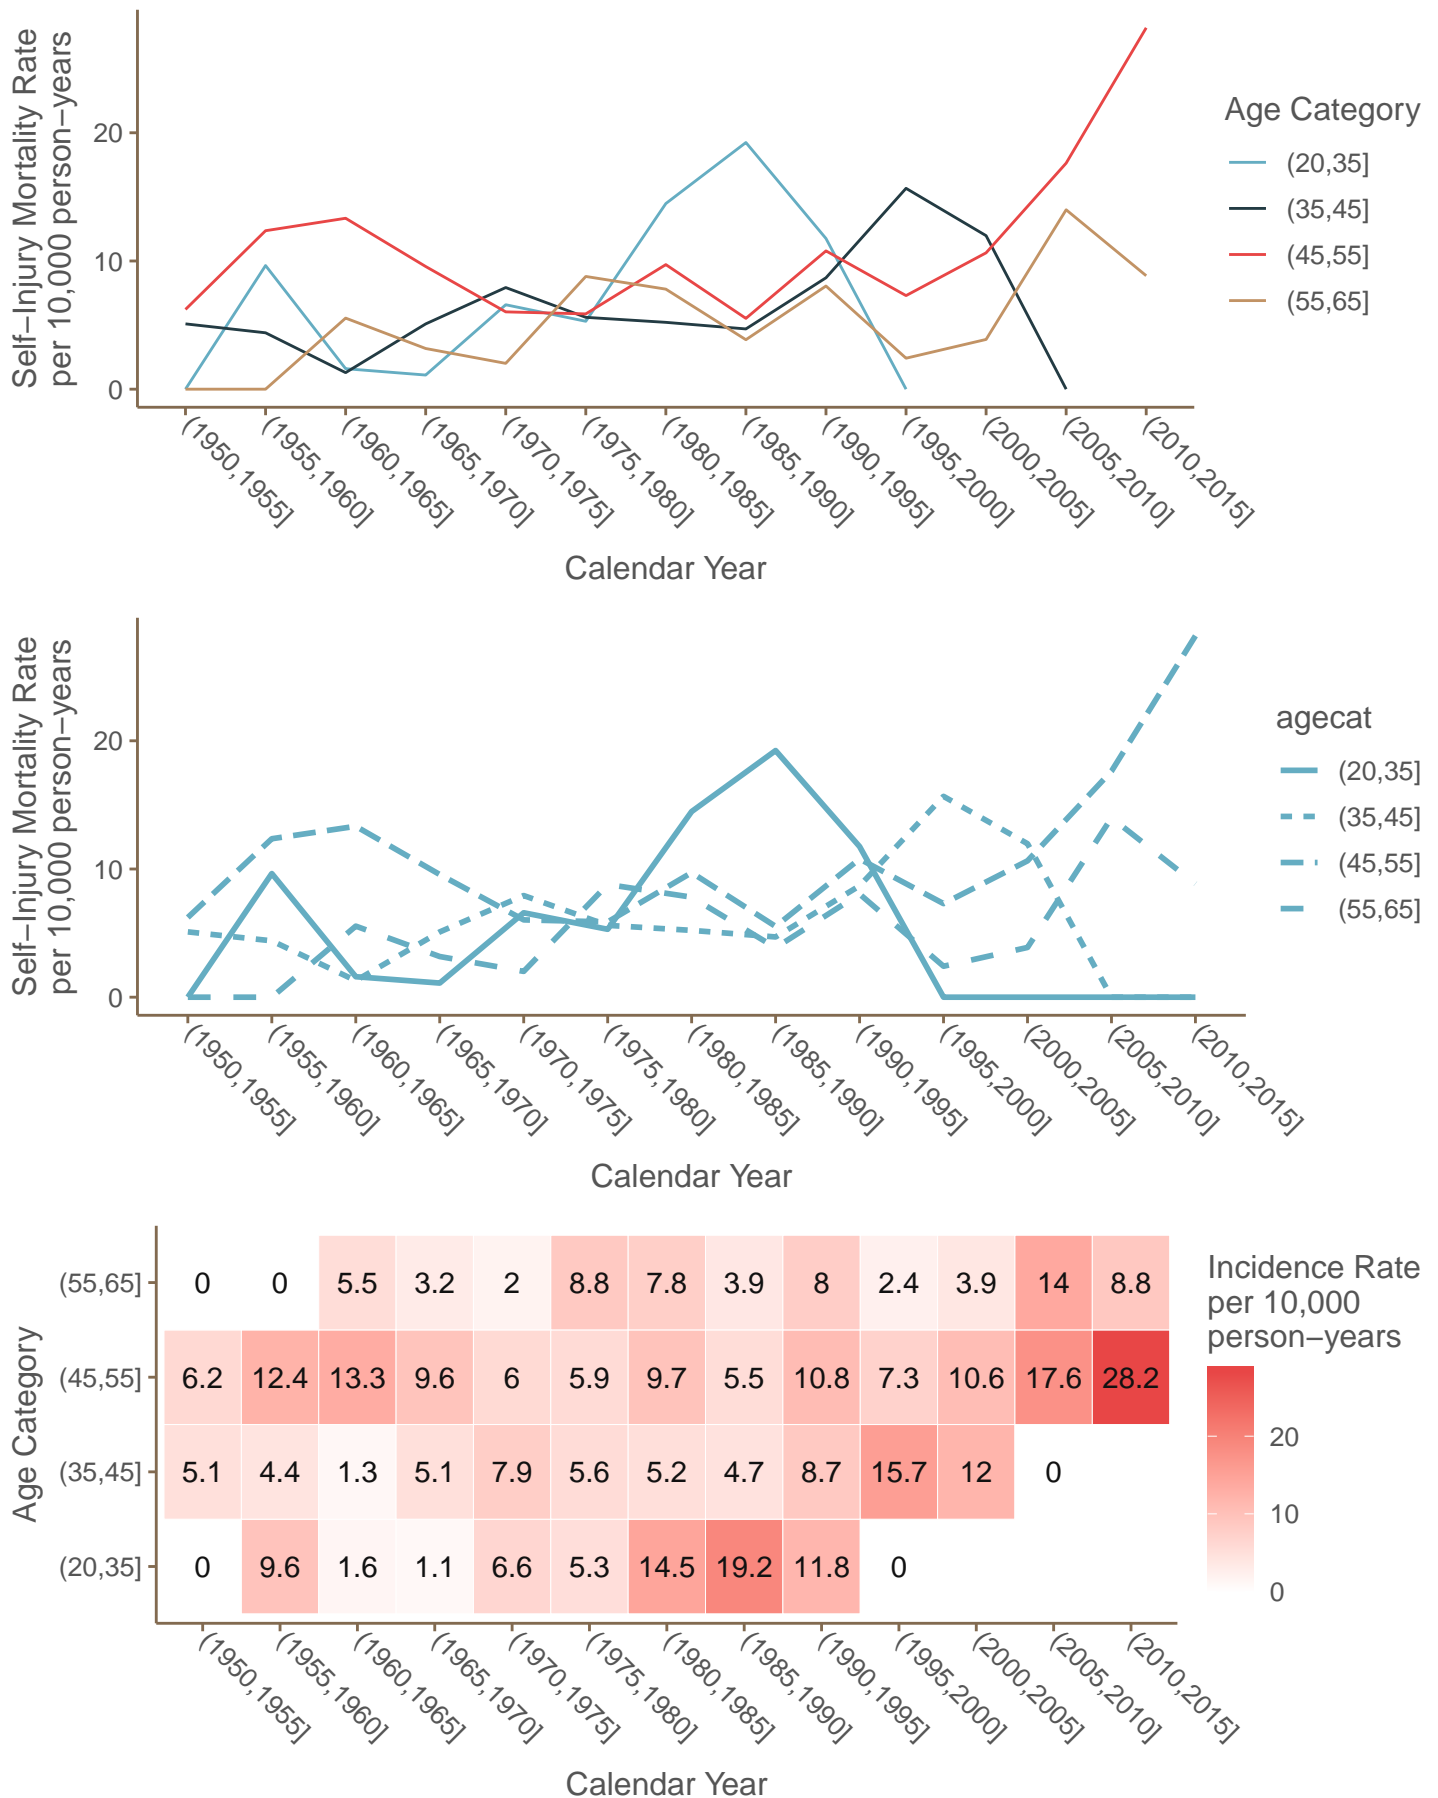

Figure 3: The estimated combined incidence rates of overdose and suicide by calendar time and age in the full UAW-GM cohort.

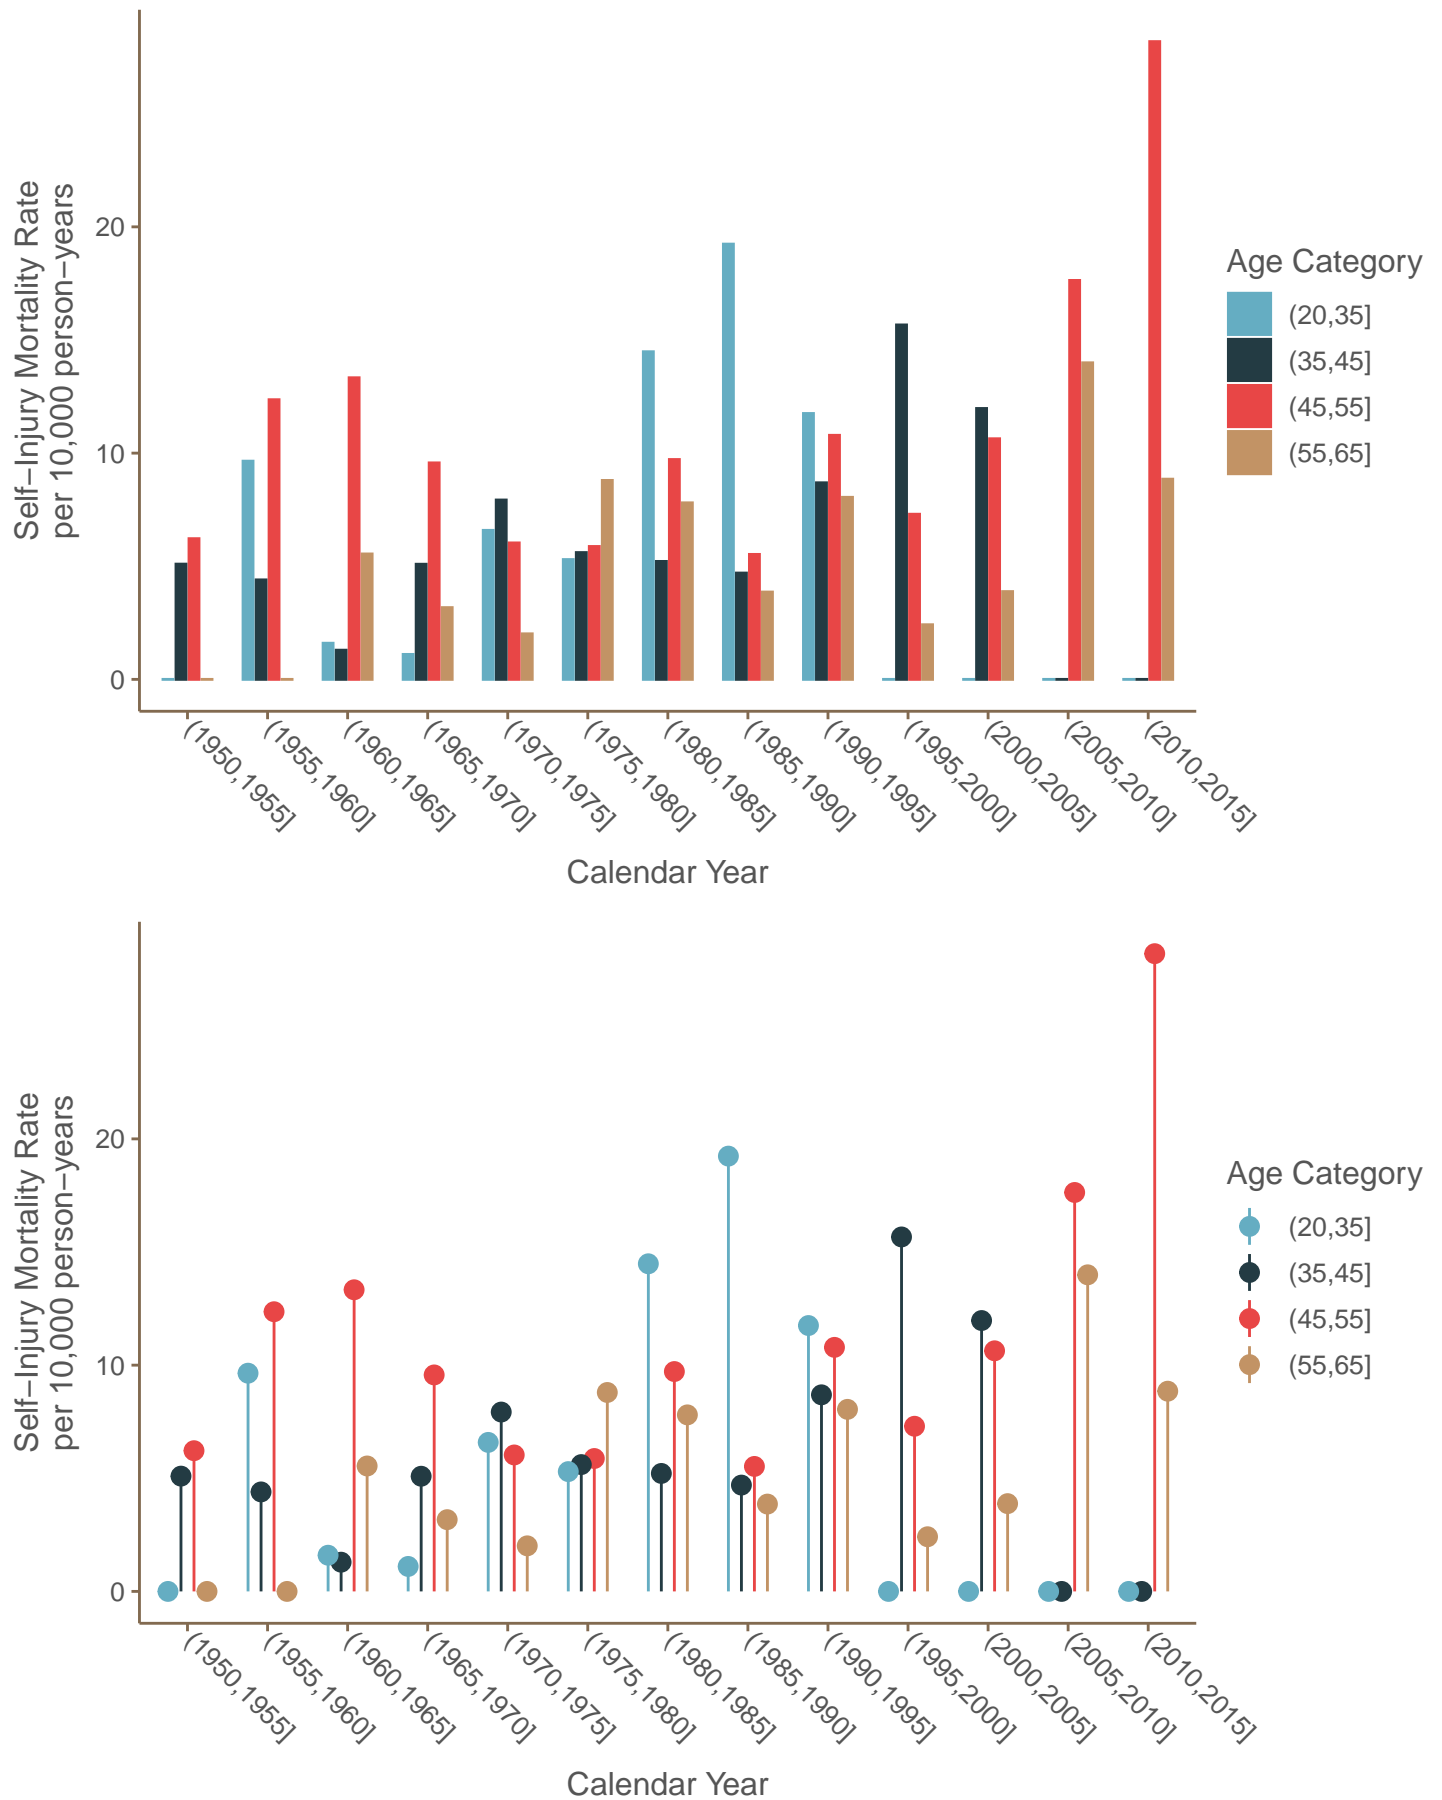

Figure 3: The estimated combined incidence rates of overdose and suicide by calendar time and age in the full UAW-GM cohort.
